

# PIRATA 23 MEETING

**2<sup>nd</sup> TAOS REVIEW MEETING**

## Save the date!

### **PIRATA organizes its annual meeting in Marseille from 22 till 26 October 2018**

The "Prediction and Research Moored Array in the Tropical Atlantic" (PIRATA) program provides in situ observations and data time-series since 1997. PIRATA is a major component of the Tropical Atlantic Observing System (TAOS). The 2nd TAOS Review Meeting is scheduled to happen back-to-back to PIRATA-23 meeting.

These meetings have to be an important opportunity to gather information on the Tropical Atlantic Observing System and PIRATA data use impacts from stakeholders, specialists in satellite measurements and products, ocean-weather-climate operational prediction, ocean biogeochemistry and resources along with socio-economic impacts of climate and environmental changes.
